

Verimi and WebID: a strategic partnership for a growing digital identity ecosystem

- **WebID expands its platform services with the Verimi Wallet, the secure digital wallet for personal identity data**
- **Verimi users will be able to identify themselves with the Verimi Wallet at participating WebID partners**
- **WebID partners can offer their customers the storage of personal identity data in the Verimi wallet**

Berlin, 16th September 2021

Verimi and WebID have entered a strategic partnership to expand the digital identity ecosystem Global Trust Technology Platform GTTP. WebID now also offers the Verimi Wallet as a method for verifying customers' identities via its international platform.

More than 300 WebID partner companies are thus given the opportunity to offer their customers the use of the identity data deposited with Verimi as a digital ID card. End customers who have not yet deposited their data with Verimi, can also be offered to store their ID data, which has just been verified by WebID, in the Verimi Wallet. In this case, WebID integrates a "Save to Verimi" option into the identification process using the established WebID-Ident methods (WebID Video Ident, WebID Account Ident, WebID eID Ident and WebID AI Ident).

"The Verimi Wallet is an excellent addition to our own comprehensive identification solutions and the numerous third-party services on our platform," Frank S. Jorga, founder and CEO of WebID, explains. "We are excited to offer our partners a sophisticated ID wallet as a new building block for an optimized digital customer experience, while taking another step in our consistent platform strategy."

Platform customers can quickly make use of the advantages of the new partnership, as Verimi will be usable within the framework of the existing technical connections. New connections are made via the existing central interface at WebID. For end customers, the Verimi Wallet serves as a digital wallet for convenient use with all connected partners from various industries.

"The strategic partnership with WebID leads to many new acceptance partners and many new use cases for Verimi users" Roland Adrian, CEO of Verimi, says. "Building reach is critical for using the full potential of digital identities- together with WebID, we are taking an important step."

About Verimi:

Verimi is a solution provider for identity verification and secure authentication of customers. The end customer does an ID check and stores their digitally verified data in their own digital wallet, the Verimi Wallet. This enables users to log into the partner accounts, identify themselves digitally, sign contracts digitally or pay digitally at any time, simply and securely. Partner companies integrate Verimi in just a few steps and thus improve the digital customer experience with maximum process efficiencies.

For the identity verification, Verimi uses all common methods, e.g. eID, bank, photo, video and on-site ident. Verimi applies particularly high security and data protection standards with data processing in Europe, integrating the secure local storage of the personal smartphone. The Verimi platform and two-factor authentication have been successfully checked by the German Federal Office for Information Security (BSI) at the trust level substantial. As a regulated payment institution, Verimi is required to comply with the Money Laundering Act (AML).

Verimi Shareholders are: Allianz, Axel Springer, Bundesdruckerei: Allianz, Axel Springer, Bundesdruckerei, Core, Daimler, Deutsche Bahn, Deutsche Bank, Deutsche Telekom, Giesecke+Devrient, GMB - an investor group of well-known insurers led by GDV DL, Here Technologies, Lufthansa, Samsung and Volkswagen Financial Services.

About WebID Solutions

WebID is the pioneer of online identification in compliance with the German Money Laundering Law. With its invention of video identification in 2012, the company created a completely new market segment. To this day, WebID sets the standard for innovative identification methods, as seen last 2020 with the invention of a fully automated identification via online banking in compliance with the German Money Laundering law.

With 18 million transactions, WebID is one of the largest providers of online identifications in Europe. With the headquarters located in Berlin, Hamburg, Solingen and Kiel are the other main WebID sites in Germany. Others are located all over the globe.

The extensive product portfolio includes numerous solutions for legally compliant online contract signatures and digital know your customer processes: from the fully automated transaction using artificial intelligence to video identification. In the area of identity management, WebID is entrusted with more than 8 million digital identities as of August 2021. As a digital ecosystem for companies, service providers, institutions and consumers, the Global Trust Technology Platform GTTP is provided by WebID for worldwide utilization of online identification processes, online fraud protection and online contract signatures.

WebIDs customers include Air Plus, Allianz, AMAG, Barclaycard, BAWAG-Group, BNP Paribas, Check24, Deutsche Bank, DKB, ING, MMOGA, Postbank, Santander, Sparda-Banken, Swisscom, Targobank, Trade Republic, Vodafone and many more.
